Certificate for the plantation of trees in the Amazon Nr. 85315

AQUAVERDE

PAITER

SURUI

MUNDURUKU de Tapajós

Through this contribution to "Plant Trees", Aquaverde provides support to reforestation programs in the Amazon conducted by the indigenous Peoples, the true "Guardians of the Forest". These programs organised and managed by the communities themselves insure restoration and protection of their natural environment, their culture and way of life and ultimately their existence as a People and the survival of the Amazon Forest.

This certificate is attributed to:

John Forest

Rebirth of a spring

The Caranazal community came to us for help to save their dying water source in 2003.

Today it's running again thanks to reforestation efforts fixing the eyes soil with the perfectly suited roots of the açaí palm tree.

Over 50.000 trees
planted since 5 years

**SURUI
CARBONO**

Certification

The Climate, Community & Biodiversity Alliance (CCBA) is a Conservation International-convened partnership between leading companies and NGOs seeking to leverage the carbon market to foster the development of forest protection and restoration projects around the world that deliver significant climate, local community and biodiversity benefits.

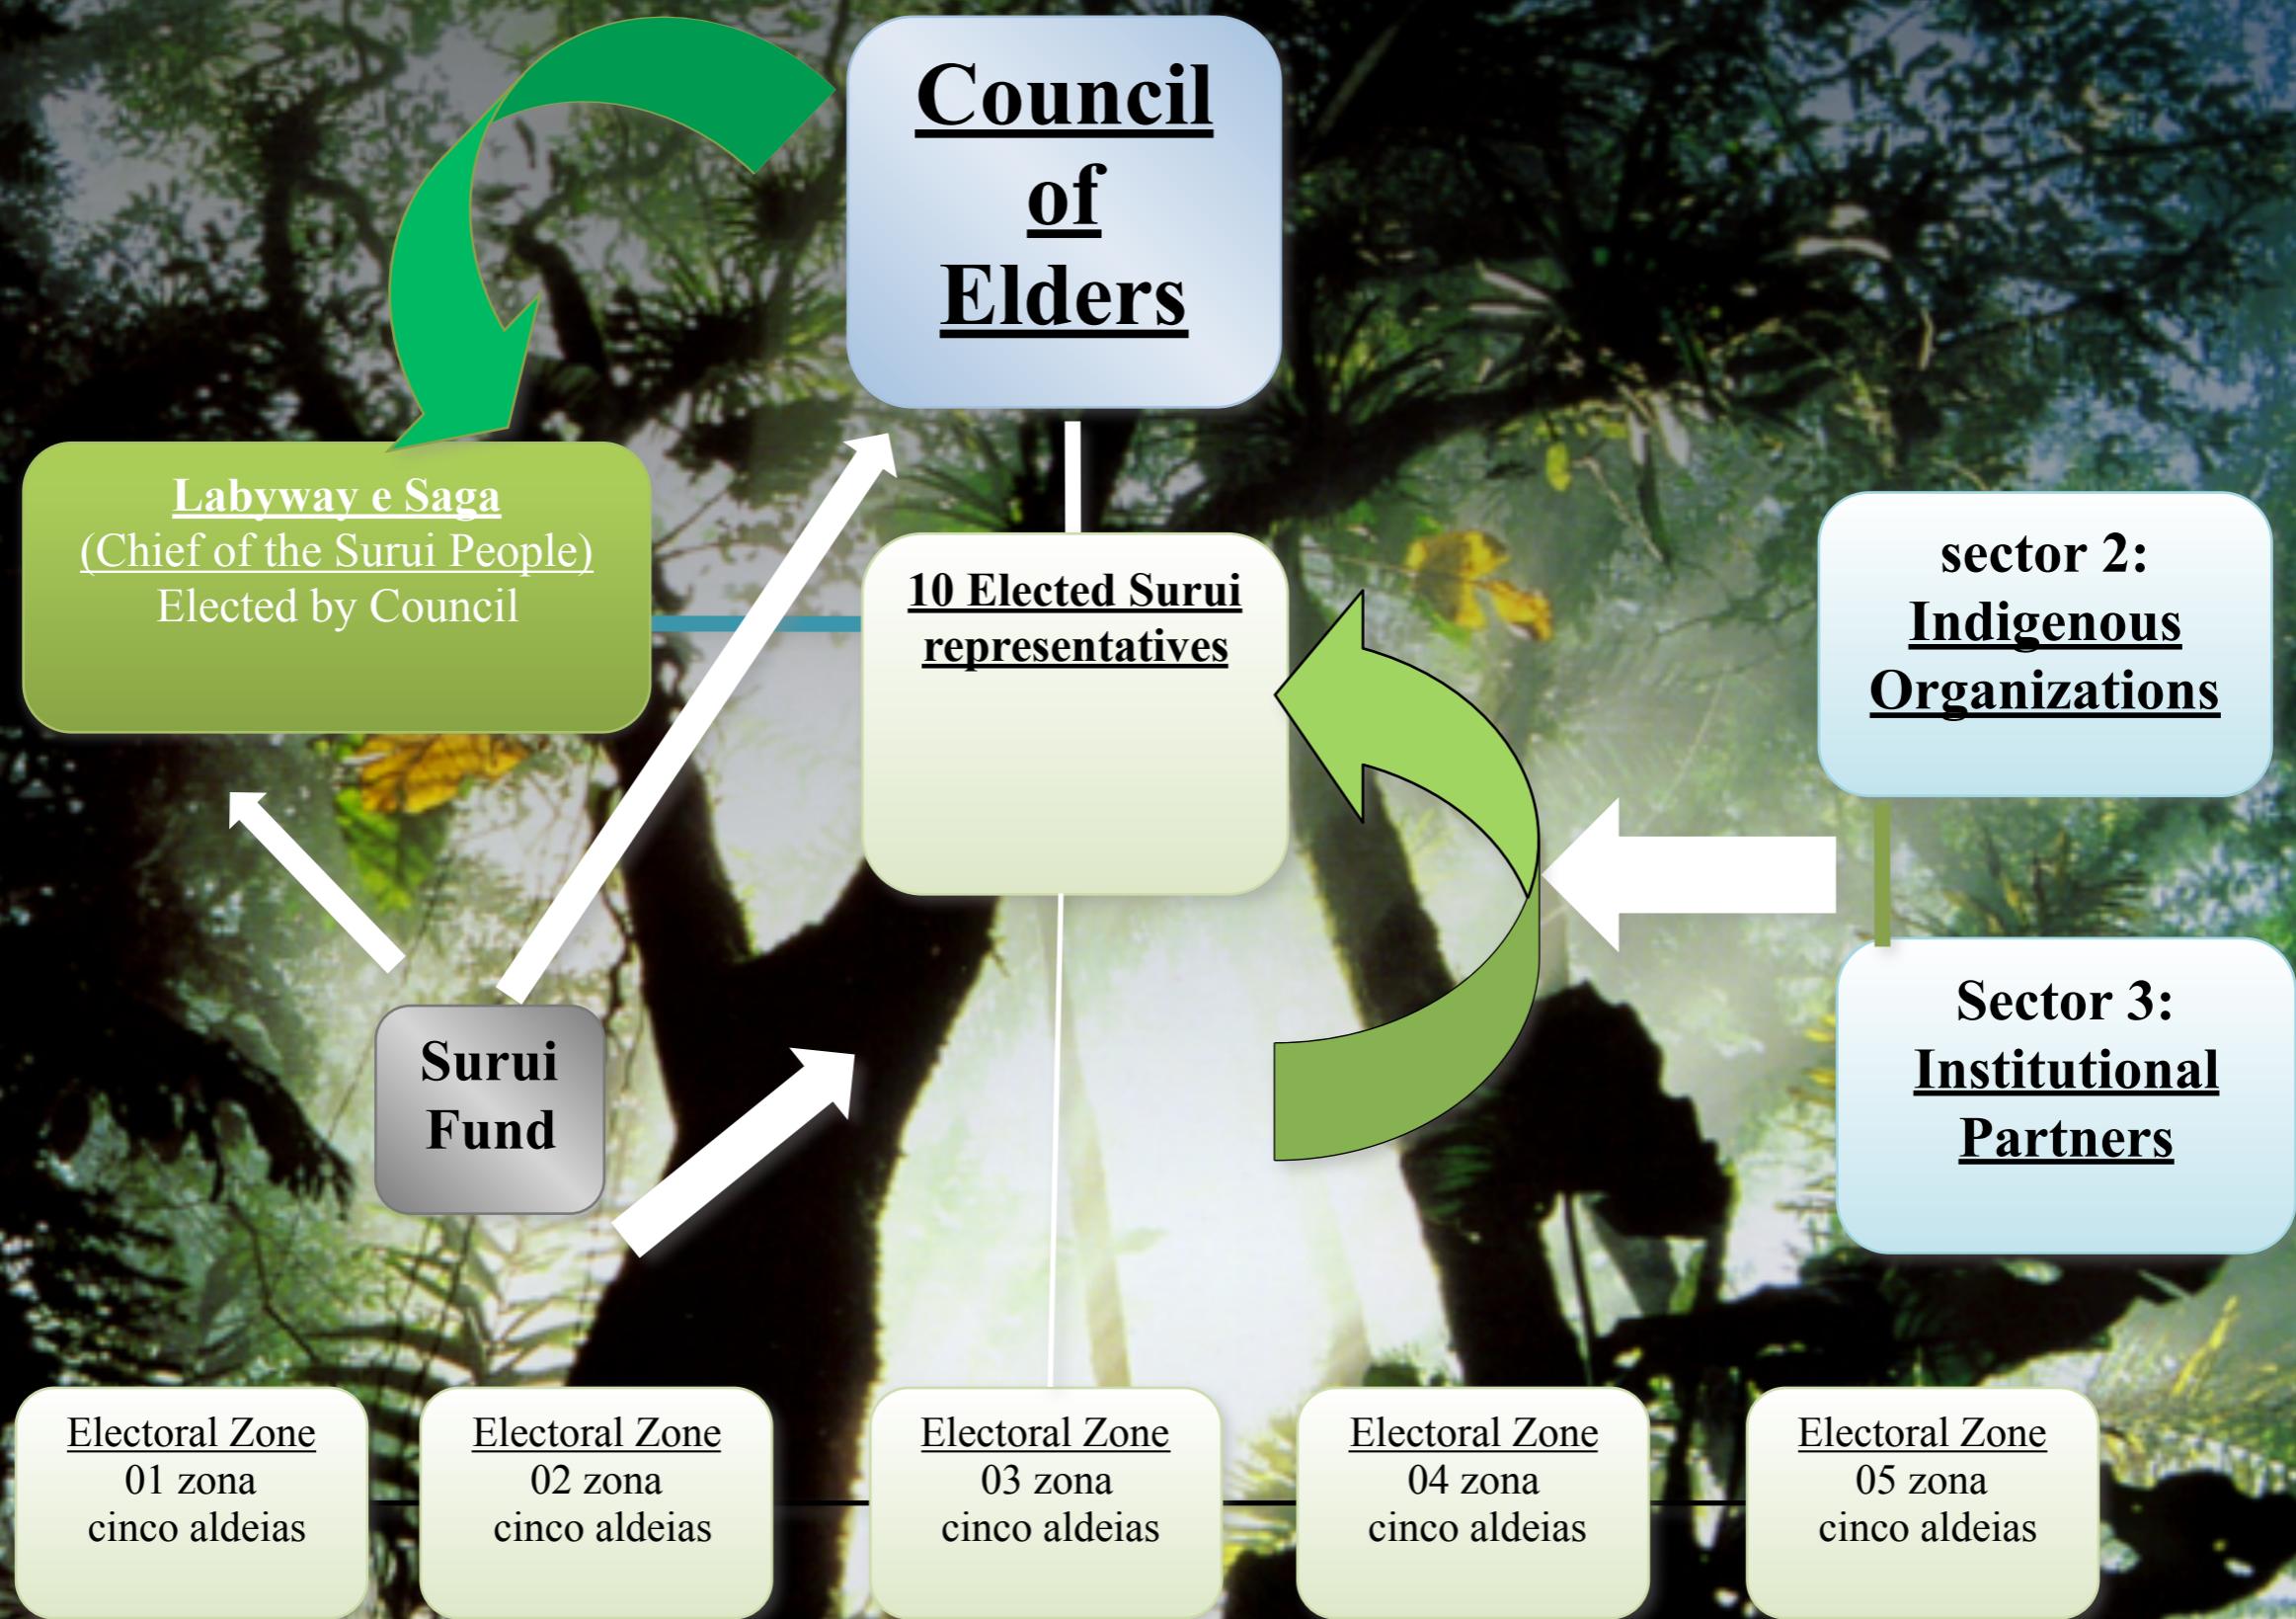

Certification

The Verified Carbon Standard provides a robust, new global standard for voluntary offset projects.

It ensures that carbon offsets that businesses and consumers buy can be trusted and have real environmental benefits.

Governance of Surui People

Surui Fund - Structure

Surui define the rules and values of the Fund

Investors' Council (Surui and donors)

Legal Agreements
